

Dr. Mehmet Ali Gulgun, born in Istanbul, finished his BSc degree in Mechanical Engineering at Bogazici University in Istanbul, In 1990, He received his MSc. Degree from Michigan State University (East Lansing MI) from Mechanics, Metallurgy and Materials Science Department. He graduated from University of Illinois at Urbana Champaign with a PhD Degree in Ceramic Engineering in 1996. Later he worked at Tokyo Institute of Technology Prof. Masahiro Yoshimura Laboratory, and Max Planck Institute-Stuttgart Prof. Manfred Ruhle's Group in Metallforschung. Since 2000, he works at Sabanci University as a professor of Ceramics in Materials Science and Nano Engineering program. He has three patents and over 60 SCI indexed articles. His research interests are ceramics, electron microscopy, cements and green technology.
