

## **Prof. Dr. Ş. Can Genç**

Ş. Can Genç is a professor of geology in the Geological Engineering department at Istanbul Technical University (ITU). He received his Bachelor in Geology Engineering at the Istanbul University in 1982, and Ph.D. in Geology at the ITU in 1993. He is still working as Professor-lecturer and researcher in ITU. He is married and has two sons.

His main interest is about petrography and mineralogy, particularly is magmatic and metamorphic petrology, including the volcanology. Recently he is interested in occurrence and usage of the ceramic and cement raw materials, beside the magmatic petrology-petrogenesis.

Ş. Can Genç is an author and co-author of more than 35 SCI-included scientific papers, about 115 International conference papers (abstracts, proceedings) together with the 80 local (Turkish) research papers, abstracts and proceedings. He has also 4 book chapters. He acts as researcher and supervisor for 2 internationals (EU, join projects), 30 local research projects, and more than 20 industry – university join projects and reviewer for local and international geology journals.
