

Prof. Dr. Semra KURAMA started to work Ceramic Engineering in Anadolu University after finishing her BSc in Chemical Engineering, Anadolu University in Eskisehir in 1992. In 1999, she continued her doctoral studies as a DAAD (Deutscher Akademischer Austauschdienst) scholarship student at IKTS-Fraunhofer (Institut für Keramische Technologien und Systeme), Dresden, Germany. She graduated from Anadolu University with PhD Degree in Ceramic Engineering in 2003. She has worked as assistant Professor, associate Professor and Professor at Anadolu University of Eskisehir, Turkey from 1992 to 2018. Since 2018, she works at Eskisehir Technical University as a professor of Materials Science and Engineering Department. She also served as Dean of Faculty of Aeronautics and Astronautics 2015 to 2020. She has three patents and over 40 SCI indexed articles. Her research interests are ceramics, synthesis of Si₃N₄, Si₃N₄/SiC composite powders and additive manufacturing.
